

Sistag expands with new business location in Singapore

Sistag AG, a leading Swiss family business and manufacturer of Wey knife gate valves, is proud to announce the establishment of its new subsidiary, Sistag Pte Ltd, in Singapore.

Text by Sistag AG

From Singapore, the Asia-Pacific market is to be served more closely in the future. The new location marks a significant milestone in the company's expansion efforts and its nearly 60-year history.

With existing subsidiaries in the United States and Germany, Sistag recognises the importance of a strong presence in key markets. "We have already successfully completed numerous projects in the Asia-Pacific region," says Samuel Sidler, CEO. "By bringing Sistag closer to our valued customers and sales partners in the region, we can better serve their needs and continue to deliver exceptional service." Initially serving as a sales location, Sistag Pte Ltd holds future potential for expansion into a warehouse or production facility. This strategic move will reduce lead time and ensure prompt delivery to customers throughout the APAC market. With its brand Wey, Sistag has been setting standards in the valve market worldwide. More than 1 million Wey valves ensure reliable connections in the mining industry, water treatment, chemical facilities, and other demanding applications. The Singapore subsidiary reaffirms the company's commitment to innovation, customer satisfaction, and global expansion.

About Sistag

Sistag AG is a Swiss company and manufacturer of the Wey valves. The family business was established 1964 and is located in Eschenbach LU, Switzerland. Subsidiaries in the United States, Germany, and Singapore and a network of over one hundred distribution partners make Sistag a leading supplier of valve technology worldwide. With a patent registered in 1956, Sistag revolutionised the design of knife gate valves. The engineer's name: Joseph Wey. Since then, Wey knife gate valves, butterfly valves and water control gates are known for their quality, performance, and reliability in numerous applications. ■

Engineered in Switzerland,
delivered all over the world.

With a patent registered in 1956, we revolutionized the design of knife gate valves forever. Our definition of performance? The highest level of quality, which stands the test of time.
